Topic Intro

A small-scale offline system for a gold pawn shop business. Instead of traditional handwritten pawn slips and manually calculated financial reports, a software system for a pawn shop will enhance efficiency, accuracy, customer satisfaction, and security, making it an indispensable tool for modern pawn shop operations.

System

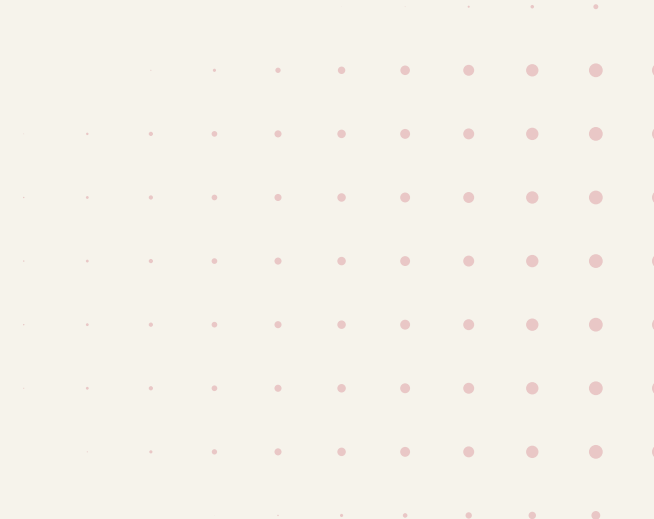

3

Our system has three subsystems

Pawning Process : Customers can pawn their jewelry for loan

Redeeming Process : Reclaim items after paying off their loan and accrued interest

Generating Report : Producing daily and monthly reports for insights

Focused Sub-System

● Function 1

Loan Estimation based on daily gold prices and evaluation of the item quality

● Function 2

Total interest calculation when the customer reclaims the item

Requirement 1

5

● Loan Estimation

Input weight of gold and purity into the system

Estimate possible loan amount based daily gold prices and shop policies

Requirement 2

6

● Interest Calculation

Interest is calculated from pawning date to current date

The rates are already predefined

Maximum loan term is 5 months

Specific rule 1 : The first month incurs the full interest

Specific rule 2 : If customer redeems in the first 7 days of subsequent months they have to pay half the month's interest

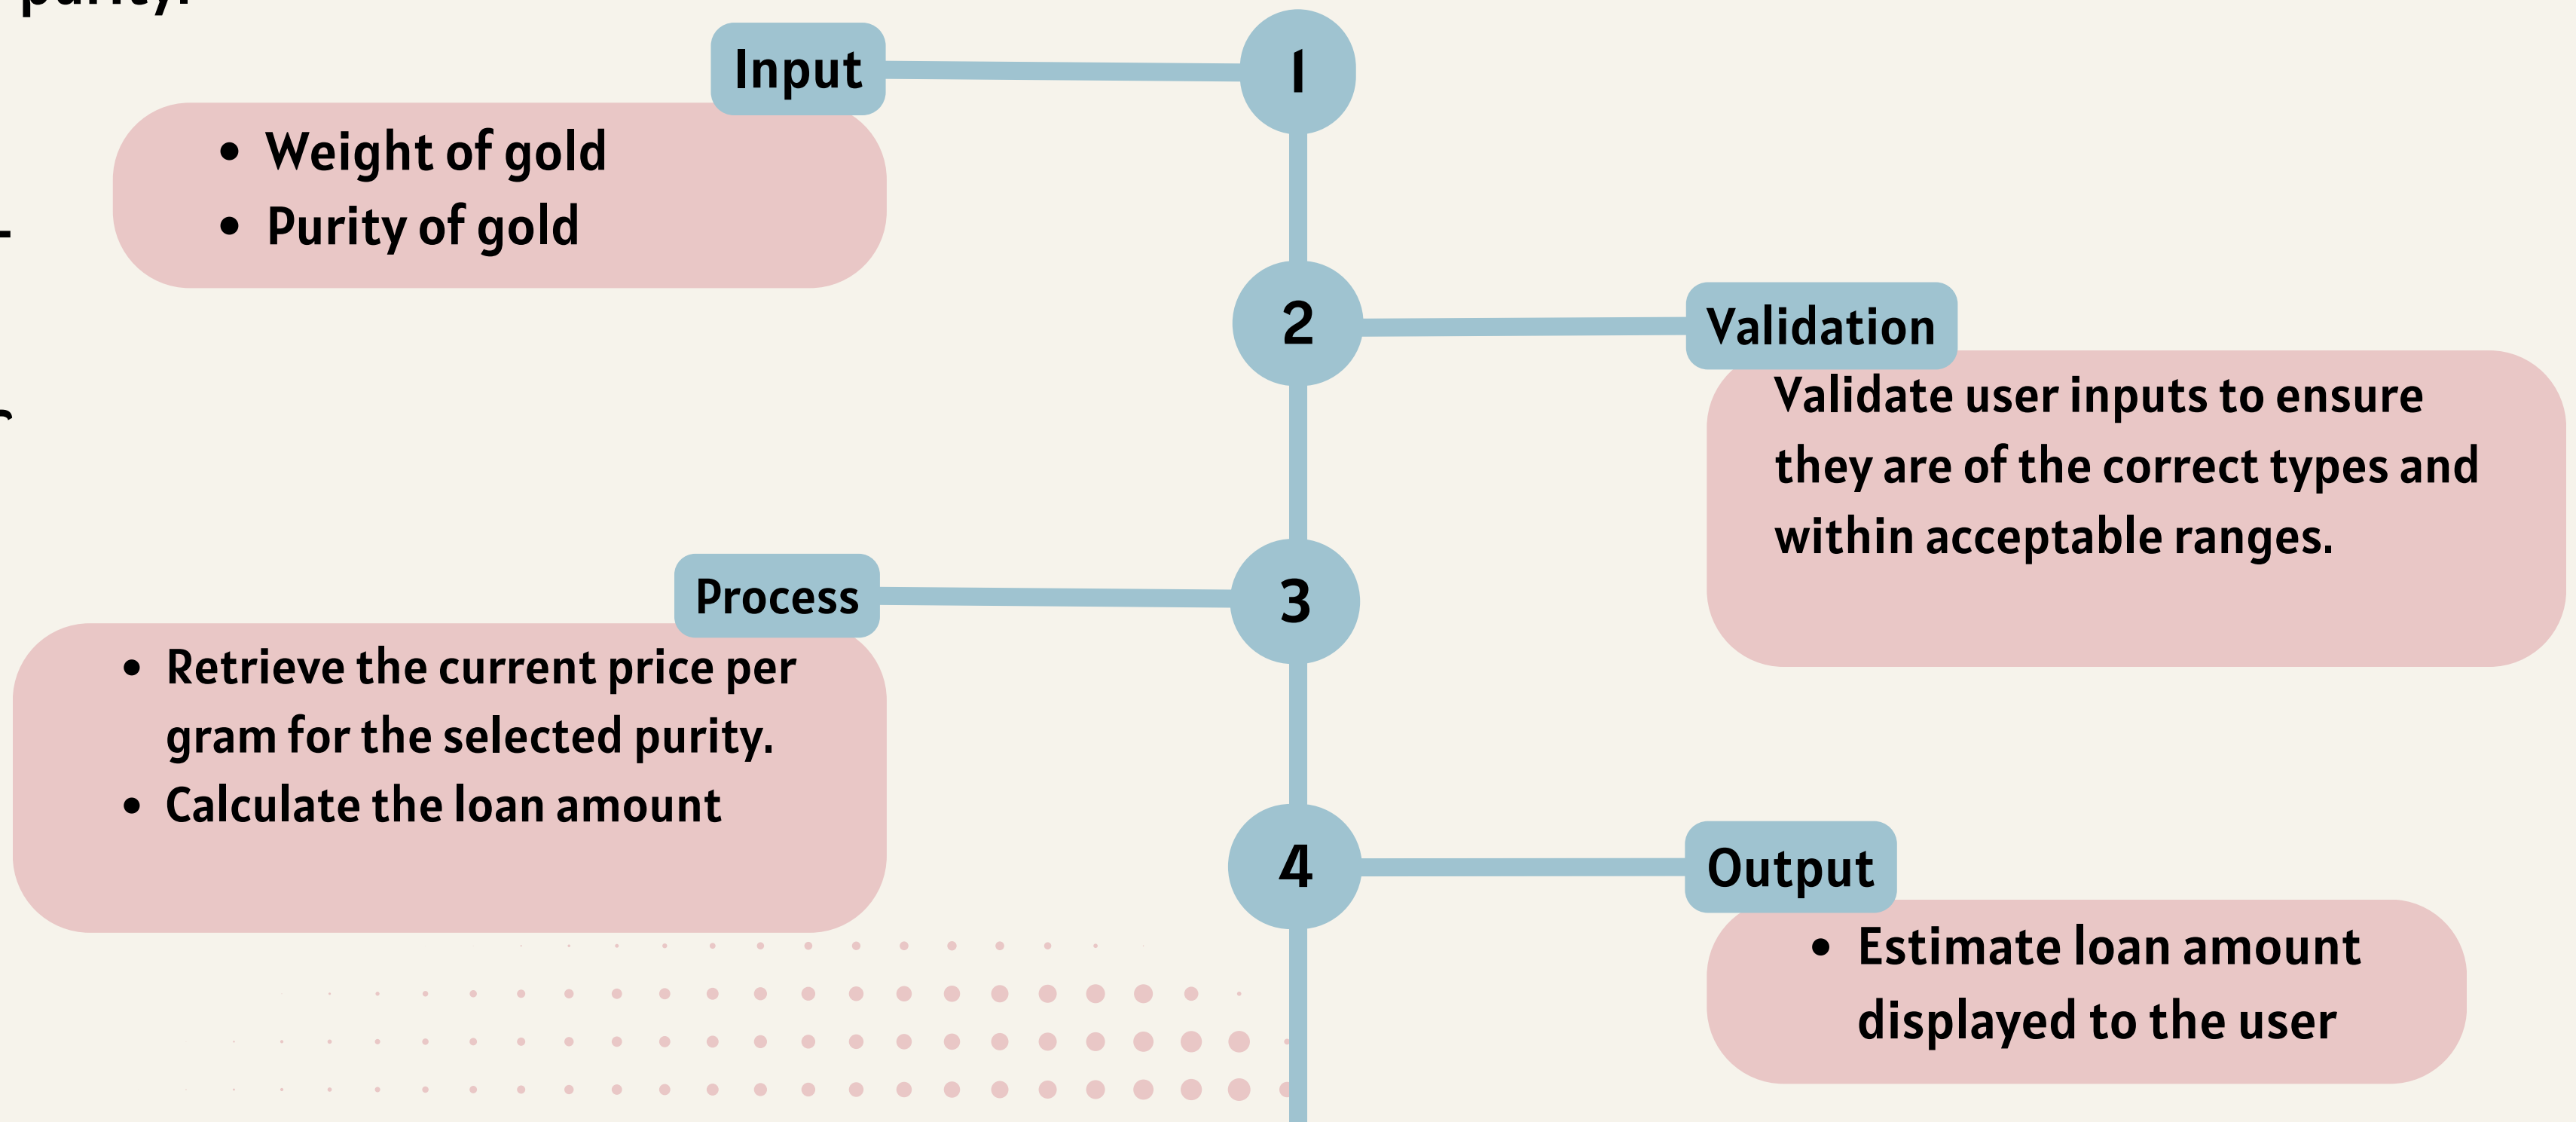

FUNCTIONAL SEPCIFICATION

7

I. Loan Estimation

Users can estimate the loan amount to offer by entering the weight of the gold and selecting its purity.

Project Proposal

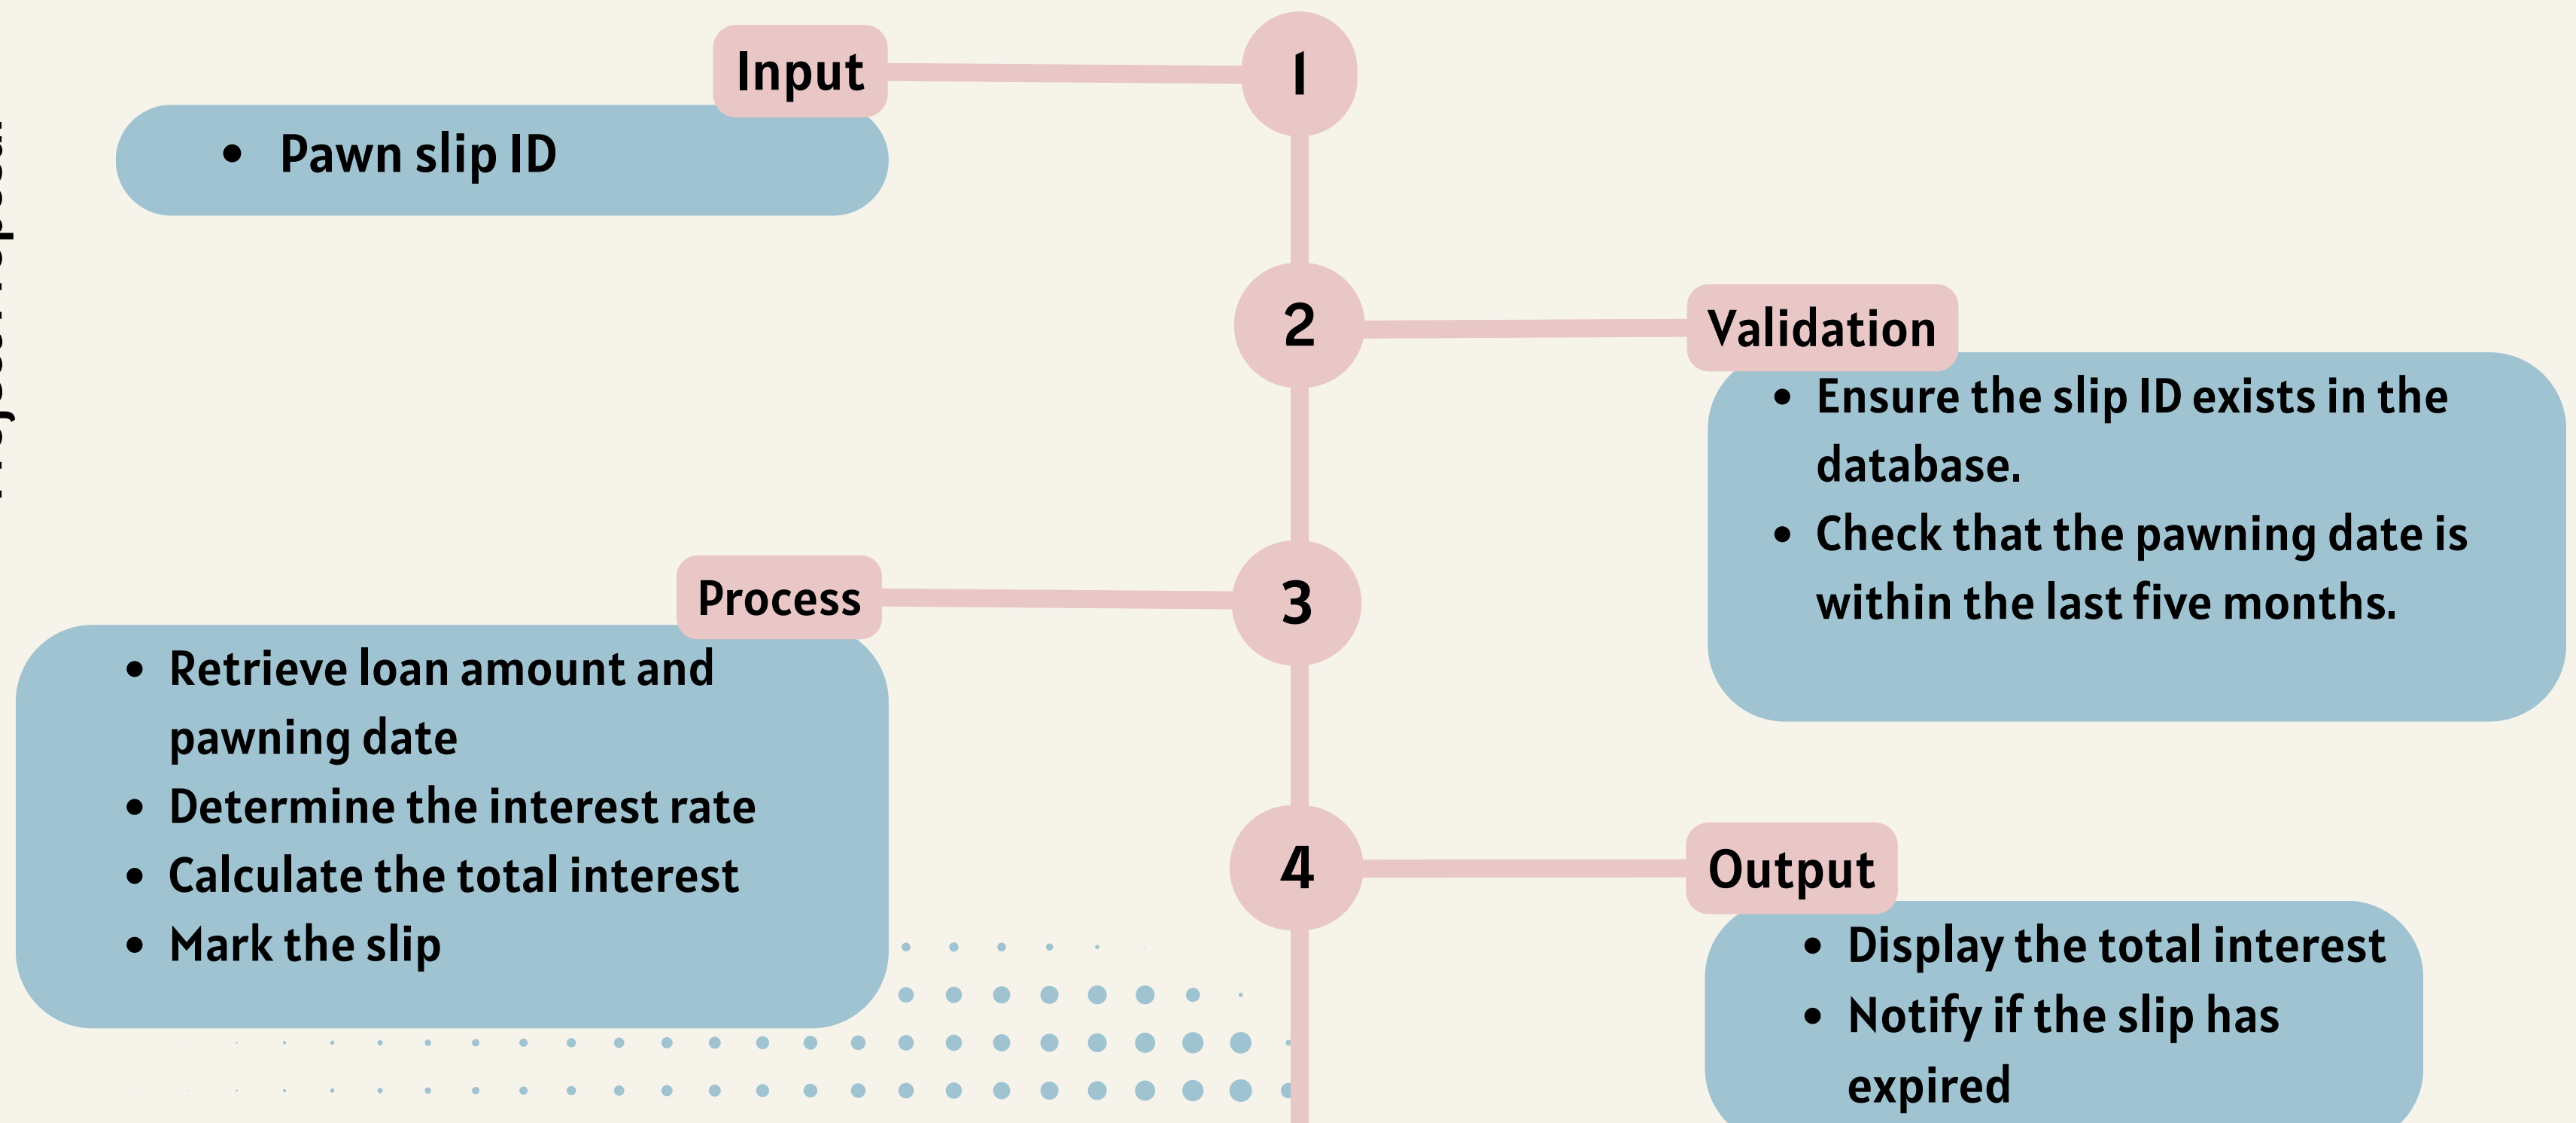

FUNCTIONAL SEPCIFICATION

8

2. Interest Calculation

Users can get the interest the customer has to pay calculated to the loan term and interest rate.

Project Proposal

STAKEHOLDERS

● Pawn Shop Owner

- Interest: daily tasks, reduce manual workload, and improve accuracy.
- Role: manage pawn slips, update gold prices, calculate loans, and interact with customers.

● Customers

- Interest: Receive quick and accurate service, reliable calculations and clear information about loans and interest.
- Role: Engage with the pawn shop services facilitated by the system.

STAKEHOLDERS

● System Admin

- Interest: Maintain system functionality
- Role: Manage system updates, troubleshoot issues, and ensure data integrity and security.

● Official Authorities

- Interest: compliance with legal and financial regulations.
- Role: Review reports and audit trails generated by the system to verify compliance.

OTHER MODULES IN THE SYSTEM

1

PAWN SLIP REGISTERING

- enter customer information and loan details into the system
- generate unique pawn slip IDs, and store in the database.

2

SEARCH AND RETRIEVAL

- search for and retrieve existing pawn slip entries
- search one slip ID or search multiple slips by a range of period or customer

3

REPORT GENERATION

- generate reports to provide insights into financial performance and profits over specified periods.

The background features three vertical stripes on the left: a wide pink stripe, a medium blue stripe, and a narrow light beige stripe. The right side of the slide is a light beige background with two rectangular areas of a pink dot pattern. The top area is a solid grid of dots, while the bottom area has a grid of dots that fades out towards the right edge.
